SPC 2019/20 冠軍隊伍的分享

Sharing from Winning Teams of SPC 2019/20

Junior Winning Team – Stewards Pooi Kei College

The participation in this competition is definitely one of the most memorable learning experiences in our school life. We feel grateful and honoured to win these prestigious awards and make a sharing here.

With the extensive use of statistical data, we have examined the housing affordability and availability in Hong Kong. It is revealed that the increase rate of the property price outweighs significantly that of the household income in the recent years. Since the housing completion rate is expected to remain low, the housing supply cliff in Hong Kong has now arrived. For the review and optimization of current housing policy, we have also made our recommendations in this research project. Besides, we have constructed eye-catching infographics to transform the statistical data and complicated subjects into visually interesting content.

Our analytical mindset and presentation skills are polished through preparing for the statistical research, final interview and oral defense. However, we have actually encountered many unforeseeable obstacles throughout the process. In particular, we have made extraordinary efforts to overcome the challenges of social distancing during the school suspension period due to the pandemic outbreak. Our team members have collaborated closely by using instant messaging technology and web conference meeting. Therefore, this competition has become a unique and invaluable learning experience for us.

To conclude, we would like to express our thankfulness to the organizer for providing students with this learning opportunity. We highly recommend this competition to students who would like to understand more about our local community in a scientific and objective manner through the proper use of statistics. This learning journey will not only broaden our horizons but also benefit all participants in the above-mentioned aspects.

Senior Winning Team – Stewards Pooi Kei College

During our project, despite facing enormous obstacles like difficulties in accessing relevant data and the adequate presentation of it through using various charts and styles, we have put our best foot forward. Countless research had already taken place months before we started to draft our project. Nevertheless, we have been greatly benefited from the project in terms of soft skills like the communication strategies, capability to persevere and collaborate for a better result by working as not on oneself, but as a whole team.

In conclusion, we appreciate the judges' recognition and acknowledgement of our efforts. It is a memorable and worthwhile experience that has significantly widened our knowledge not only in terms of the presentation of data but raising awareness of the issues happening around us in our society. Last but not least, we have named several dilemmas and solutions that the retirement protection system of Hong Kong is currently facing, and as our city is stepping into age with a population which is quickly aging, we hope that remedial actions would be taken so that allow our elderlies whose contributions to our society is widely commended, to have a tranquil, serene and comfortable retirement life.
